Are clients and prospective clients able to access your company 24/7?

With a Web site designed and hosted by **Tri Valley Internet**, the answer is **Yes**, because whether it's strictly an information resource or an e-commerce site, your Web site is marketing your company full-time, even when you're taking a day off.

Do visitors to your site find your contact information immediately on your home page?

With a Web site designed by **Tri Valley Internet**, the answer is **Yes**, because our Web savvy designers create user-friendly, easy-to-navigate sites that draw customers in and engage them while they're on. Our experienced graphic artists are trained in computer design, and our expert technicians are certified in Microsoft, Cisco, and Novell applications.

In the event of a power outage or other catastrophe, will your Web site remain operating?

With a Web site hosted by **Tri Valley Internet**, the answer is **Yes**, because our network of high-end, redundant servers is located in a secure, tier one, disaster-proof facility in San Jose, which means assured reliability to you.

Tri Valley Internet Web Design • Tri Valley Internet Web Hosting

We help you succeed in business by designing and hosting a Web site that

- strengthens your core business,
 - meets the needs of your operations,
 - directly targets your key markets, and
 - generates leads beyond the abilities of your current marketing tools.
